*** Final program eligibility will be determined during the address selection for each Group.**

Funds for the Residential Sound Insulation Program ("RSI") are provided by the Federal Aviation Administration ("FAA") and the Los Angeles World Airports ("LAWA"). The City of El Segundo does not provide any of the funding for the RSI program. However, the City has expended significant resources in the past for purposes of obtaining as much RSI funding as possible for the residents of El Segundo.

Eligibility for funding is also determined by the FAA and LAWA. There is the potential that depending on the location of your property relative to the airport that the FAA and/or LAWA may determine that your property is not eligible for funding. FAA's and LAWA's criteria for eligibility are subject to change. Accordingly, while the City of El Segundo will allow you to sign up for the RSI Program, given it must comply with FAA and LAWA restrictions, it cannot and does not guarantee that you will receive RSI Program funding.
