

Guide to replacing or installing a water service line between the city water meter and a house or building

- 1. Obtain a plumbing permit from the Building and Safety Department for work that will be performed on private property.
- 2. Obtain a Public Works Encroachment permit from the Engineering Division of Public Works for work that is performed in the water meter box and the public right of way.
- 3. Contact the City of El Segundo Water Division to have the water meter stop shut off before beginning work and to turn the water back on after work is performed.
- 4. Connections to the meter shall be made with a rubber gasketed meter coupling.

3/4" and 1" Meter coupling made of brass

1-1/2" and 2" Meter flange made of brass
