Public Works Department
Pre-Construction Notification Letter

Property Owners/Tenants: Adjacent to ramp locations as shown on map herein.

September 21, 2016

Subject: Construction Notice for Community Development Block Grant (CDBG)
Project 601718-15, “Installation of American with Disabilities Act (ADA)
Sidewalk Ramp Project”, Project No. PW 15-24

Dear Residents,

As part of the U.S. Department of Housing and Urban Development, Community Development Block Grant (CDBG) Program, the curb ramps in front of your house and/or within your neighborhood have been selected to be reconstructed to meet federal ADA requirements for pedestrians. The City of El Segundo, Department of Public Works, will soon begin construction on the curb ramps in your neighborhood (see included map). The intent of this letter is to help you understand the project and minimize any inconvenience you may encounter. Information about the project is listed below:

**When will the ramp construction begin?**
The project is estimated to begin on September 26, 2016 at various locations throughout the City, which may not be directly adjacent to your property. The total duration of the project is anticipated to be three (3) weeks, with most of the work at each intersection being completed within 5 days. Please note that the schedule may change based on material availability, weather conditions, and/or construction conflicts.

**What work will be done?**
The existing sidewalk around the curb return will be demolished using a pneumatic drill or similar. The Contractor will then pour the new concrete curb ramp meeting federal ADA requirements. After concrete construction, asphalt slot paving next to the new ramps will be constructed.
Where will the ramp construction take place?
The location of the ramps has been identified as shown on the above project map. Locations were selected based on areas of the City that are most in need of upgrades.

How can you help?
- Please obey the “NO PARKING SIGNS” that will be located adjacent to the ramps.
- Please take caution on the sidewalk and avoid the ramp locations to protect personal safety and prevent delays to the project.
- Please contact the Contractor directly for any on-site, day-to-day questions you may have about timing and access. The Contractor’s contact information is provided as follows: FS Contractors, Inc. (818-838-6040). Please contact Ms. Cheryl Ebert, City of El Segundo, Senior Civil Engineer, at (310) 524-2321 for any general questions you may have.

Thank you for your cooperation.

Cheryl Ebert
